SUMMARY

As a dedicated Software Engineer, I specialize in building responsive, user-centric web applications with modern technologies. With hands-on experience using HTML, CSS, JavaScript, React, and Angular, I've developed and deployed real-world projects—from a personal portfolio site and e-commerce platform to a real-time courier tracking system and mobile shopping app. I hold a Bachelor's Degree in Computer Science from Georgia State University and currently contribute to full-stack applications as a MEAN stack intern. Passionate about clean design and scalable code, I continually grow my expertise in modern frameworks, RESTful APIs, cloud deployment, and agile practices.

EDUCATION

Georgia State University | GPA: 3.61

Atlanta, GA

B.S. in Computer Science

Dec 2024

• Relevant Coursework:

- Web Programming, Mobile Development, System-Level Programming, Data Structures & Algorithms, Operating Systems.
- Cloud Computing, Big Data, Machine Learning, Cybersecurity Fundamentals.

• Certificate:

- STEM Scholar, President's list, and Dean's list.
- freeCodeCamp – Legacy JavaScript Algorithm and Data Structures (May 2025)

WORK EXPERIENCE

MEAN Stack Developer Intern

Remote

Antra. Inc — Fulltime Internship

March 2025 – May 2025

- Contributing to real-world projects using **Angular**, **Node.js**, **Express.js**, and **MongoDB** under agile development practices.
- Building scalable front-end applications with **Angular**, applying advanced concepts such as **RxJS**, **NgRx**, and **Reactive Forms**.
- Developing and integrating secure RESTful APIs with **NestJS**, **JWT authentication**, and **MongoDB** for full-stack web applications.
- Collaborating with cross-functional teams using Git, JIRA, and participating in daily standups and code reviews.

TECHNICAL SKILLS

- **Programing Languages:** Java, JavaScript, TypeScript, C, C++, HTML, CSS, Node.js, Dart.
- **Frameworks & Libraries:** React, Flutter, Bootstrap, Angular, Express.js.
- **Database:** MongoDB, MySQL.
- **Tools & Technologies:** Git, GitHub, Cloud Computing, VS Code, IntelliJ IDEA, PyCharm.
- **Cloud Platform & Deployment:** Oracle Cloud, AWS.

PROJECTS

My Portfolio | <https://sophie-portfolio-one.vercel.app/>

Sep 2024

- Developed a responsive portfolio website using ReactJS to showcase frontend development skills, projects, and experience.
- Designed a visually appealing interface optimized for various devices and screen sizes.
- Deployed via Vercel for seamless continuous deployment and scalability.

TrackTrek - Courier Tracking Website | <https://github.com/sophieLe256/CSC-SWE-Group3>

Jan 2024 – Dec 2024

- Implemented real-time parcel tracking, notifications, and secure authentication.
- Integrated Google Cloud services and optimized delivery routes. Emphasized accessibility and continuous improvement through user feedback. Proficient in Python, Django, and collaborative teamwork.

Bad Rabbits Website | <https://github.com/sophieLe256/Web-project>

Jul 2022 - Dec 2022

- Developed a dynamic e-commerce website using React for the frontend and a Node.js backend.
- Utilized Oracle for hosting, ensuring scalability and reliability.
- Integrated a robust MySQL database system to manage product data, user information.

Mobile App | https://github.com/sophieLe256/mobile_final_app_project

Nov 2023 – Dec 2023

- Developed a mobile shopping app using Flutter, featuring a collection of Nike shoes available for purchase, user authentication, and favorite item functionality integrated with Firebase.
- Implemented user-friendly login/logout features and Firebase integration for streamlined authentication and data management within the app.
